

Mission Statement :

At Retrotherm, our mission is to engineer excellence in every aspect of Thermal Engineering, setting the standard for cutting-edge boiler solutions. We are dedicated to providing innovative and sustainable engineering services at optimum cost. With our commitment to reliable thermal solutions, we strive to be the trusted partner of choice, delivering unparalleled value and driving progress through Innovative solutions to our customers.

About Us :

- Retrotherm is an Extended Design office for our customers, with a highly experienced workforce in a wide variety of technologies for firing various fuels for steam generation, Power Plant, WHRB; delivering highly efficient, reliable, and cost-effective designs in shortest cycle time.
- You can refer your complex problems related to heat transfer to Retrotherm. Our solution will bring you substantial savings & improved execution efficiencies at a modest price.
- While providing the designs / drawings to our customers, we go in all the minute details using the latest design tools and software, so that the customer gets all the clarity about the designs.
- We build positive, long-term relationships with our stakeholders that are built on trust, respect and collaboration.

Products & Services

1) Engineering Services

- a) Thermal Engineering
- b) Detail Engineering for Complete Boiler, Heat Exchangers, and Pressure Vessels
- c) Piping Design and Stress Analysis
- d) Complete Package for Civil Engineering and Electrical & Instrumentation Engineering
- e) Complete Package for Power Plant Engineering
- f) Pollution Control Equipment

2) Equipment & Spares

- a) Spares for Pressure parts
- b) Spares for Equipment
- c) Spares for ESP
- d) Wet Scrubber System
- e) IBR Valves, Control Valves & Piping
- f) ESP and Bag Filter
- g) DM Plant
- h) Sugar Equipment

3) Consultancy Services

- a) Owner Consultant for Boiler & Power Plant
- b) Annual Consultancy Contract
- c) Troubleshooting
- d) Energy Audits
- e) RLA Services
